This is an old collection (2006)of custom wrestler instructions for various games in the WWE Smackdown and Smackdown vs Raw games. Many of these were taken from gamewinners.com and caws.ws, both of which no longer exist in their original state, so I wanted to be sure to archive these online.

A couple of the documents have corrupted tables and won't display properly in wordpad. However, if you have access to a copy of Microsoft Word, you may be able to fix them using that.
